In keeping with a promise made contributors to the state exhibit at New Orleans, the commissioner in charge presents this catalogue, with a knowledge of its incompleteness. In many instances no invoice whatever was furnished, thus compelling reliance only on frail paper tags attached to articles when shipped from their original point in the state. A very large proportion of these were lost before the exhibit was installed, or even in the space. Before and since my return to the state, I have made all possible efforts to obtain names of donors, their post-office address, list of articles donated, etc., and here present the best obtainable.
